Session 3 learning objectives

Session 3 learning objectives

Level 3: Governance and adoption | 90 minutes

By the end of this session, participants will be able to:

1. **Compare** individual convenience uses with organizational policy and classify examples as green, amber, or red.
2. **Analyze** a fictional organizational AI challenge using a governance lens (no real operational data).
3. **Choose** among no AI, more evidence and consultation, or a limited pilot for organizational review.
4. **Challenge** another group's decision from frontline, manager, and policy perspectives.
5. **Revise** a decision with a named approval owner and safe next action.
6. **Draft** key fields of a bounded pilot charter (owner, baseline, inputs, success, exit).

Observable behaviours

- Records a governance decision with consultation gaps named explicitly
- Identifies at least two stakeholder perspectives that change the recommendation
- Names an approval owner and stop threshold
- States that classroom exercise is not community consultation
