Session 3 participant worksheet

Session 3 participant worksheet

Fictional brief (SYNTHETIC): A partner invites your organization to upload a 2,400-household registration dataset (names, locations, vulnerability flags) to their AI analytics platform. Your organization has no AI governance framework.

Part A: Initial decision

Choose one:

- ☐ No AI until framework exists
- ☐ More evidence and consultation first
- ☐ Limited pilot for leadership review

Rationale (3 sentences):

Part B: Pilot charter (if pilot or evidence path)

Scaffolding prompts (delete before submitting if not needed):

- *Baseline:* How do staff do this task today without AI?
- *Inputs:* List data types; mark each public / internal / personal / sensitive.
- *Consultation:* Which affected groups and local partners must be consulted before any live pilot?
- *Stop rule:* What single event ends the pilot (e.g., one wrong location SMS, one privacy incident)?

Field	Your draft
Task and non-AI baseline	
Accountable owner	
Permitted inputs	
Tool/vendor checks needed	
Consultation still required (include Indigenous/partner voices where relevant)	
Success measure	
Failure / stop threshold	
Human approval point	
Manual fallback	
Safe exit if terms change	

Part C: After challenge

Perspective that changed your view:

Revised decision:

Approval owner:

Safe next action at work:
