Three-session training: deliverables and acceptance checklist

Three-session training: deliverables and acceptance checklist

Illustrative training-design sample. Not a record of delivered work. Agree owners, dates and formats before using this checklist for an engagement.

Stage	Deliverable	Acceptance check	Reviewer and record
Inception	One-page audience, objectives and access brief	Names the audience, three observable learning outcomes, permitted practice data, language/access needs, platform owner and decision contact. No participant case records are required.	Sponsor signs off the brief; retain version and date.
Before each session	Agenda, accessible slides, editable text worksheet and synthetic/public source packet	Files open without a paid account. Headings, reading order, links, contrast and text alternatives are checked; a text-only route covers every activity. Source packets identify what is fact, what is invented for practice and what must not be used operationally.	Sponsor reviews materials by an agreed lead time; facilitator logs corrections.
Session 1	Foundations session and short baseline check	The session is delivered or rescheduled; each learner can distinguish a permitted low-risk exercise from one requiring review or a stop. Baseline	Attendance count, timing log and anonymous question themes.

Stage	Deliverable	Acceptance check	Reviewer and record
		response count is recorded without claiming improvement.	
Session 2	Applied practice session and answer key	Learners compare a supplied draft with its source, identify unsupported or missing facts, and record a human review decision. Both group and no-breakout routes are usable.	Completed sample response, facilitator answer key and issue log.
Session 3	Decision-and-transfer session	Learners use the same checks to draft one bounded next action, approval owner, fallback and stop condition. A short end check uses comparable difficulty to the baseline.	Count of submitted action plans and end-check responses, not a claim of workplace impact.
Handoff	Reusable resource pack	Three agendas, accessible source files, worksheets, answer keys and a facilitator note are present, editable and consistently versioned; licence/reuse terms are stated.	Sponsor checks each file against the manifest and records exceptions.
Reporting	One-page results and recommendations	Shows attendance by session; baseline/end denominators and missingness; observed task performance, feedback themes, limitations and prioritized next steps. Quotes are non-identifying and used	Sponsor accepts the report or returns one consolidated correction list by an agreed date.

Stage	Deliverable	Acceptance check	Reviewer and record
		only with permission.	

Acceptance rule: A deliverable is complete when its listed files and checks pass and the named reviewer records acceptance. A correction to an agreed deliverable is logged and resolved; a new audience, extra session, new language service or new platform is a change for separate written agreement. Attendance and learning targets are measured, not guaranteed.
