# Session 1 facilitation tips

## Session 1 facilitation tips

### Low-bandwidth settings

- Email case text and worksheet 48 hours before the session
- **Synchronous route:** phone dial-in plus typed chat; facilitator reads chat aloud; no video required (see technology checklist)
- Use plenary discussion instead of breakouts if connections drop
- **Asynchronous fallback only when live join is impossible:** worksheet within 48 hours
- Avoid video-heavy slides; all content is text-based

### Inclusion

- Offer French materials in advance; live facilitation may be English with written FR questions welcomed
- Describe any diagram verbally
- Repeat chat contributions aloud for audio-only participants
- No-breakout route: facilitator reads case; individuals complete worksheet; debrief in plenary

### Difficult moments

**Participant shares real case data:** Pause activity. Ask co-host to remove from chat per platform rules. Refer privately to hosting organization’s contact. Do not copy into notes.

**“AI is always dangerous”:** Acknowledge risk. Redirect to screen: some green uses exist with checks. Proficiency requires discrimination, not blanket refusal.

**“Our org has no policy”:** Amber by default. Action plan: ask leadership for guidance. Session 3 addresses governance.

### Pacing for large groups (35 to 40)

- Use 5 groups of 7 to 8; pairs within groups for worksheet sections
- Collect G/A/R via poll tool instead of lengthy verbal reports
- Pre-assign group numbers in registration email

### Evidence of learning

- Collect worksheets (anonymous codes only)
- Score using four-point rubric
- Note themes for adaptation note to hosting organization within 3 business days
