Session 3 speaker notes

Session 3 speaker notes

Teach block

Use examples from participants' org types (international NGO, domestic charity, faith-based, multilateral affiliate). Do not name real vendors from the room.

Decision block

Most groups should land on option 2 or a heavily bounded option 3. Full green adoption should be rare.

Push groups to fill charter fields even if decision is "no AI."

Challenge block

Assign challenge groups randomly. Require revision, not defense only.

Watch for performative "we consulted communities" language. Correct gently: exercise is fictional.

Post-assessment

Allow 10 minutes after session if hosting organization wants same-day completion.

Close

Promote clinic: questions must be de-identified. No case numbers or beneficiary details.
