Participant handbook

Participant handbook

Learning materials only. For staff joining the three-session series and optional clinic.

What this training is

- Three 90-minute sessions plus an optional 60-minute follow-up clinic
- Synthetic case studies only; no real beneficiary or operational records in exercises
- Skills focus: screen tasks, verify outputs, protect data, and draft bounded pilot charters
- Not legal advice; follow your organization's policies and counsel

What you need

Item	Required?	Notes
Paid AI account	No	Default route uses pre-supplied outputs
Camera	No	Typed chat participation is equivalent
Stable video	No	Phone plus chat route available (see technology checklist)
Pre-reading	Optional	AI use decision guide recommended

Session overview

Session	You will practice
1	Seven-step screen; green, amber, red decisions; SMS translation case
2	Structured prompts; source-check tables; role-based workflow choices
3	Pilot charter; transparency card exercise; governance options; safeguarding and protection lens
Clinic	De-identified workplace questions only

Your responsibilities

1. **Protect data:** Do not paste real names, case numbers, locations, or donor details into chat, worksheets, or any AI tool during the series.
2. **Verify before action:** Classroom decisions do not authorize operational use. A named approver at your organization must approve real work.

3. **Speak up:** If you cannot access breakouts, captions, or materials, tell the host before Session 1.
4. **Safeguarding:** If you need to discuss a disclosure of harm or child protection concern, contact your organization's focal point. Facilitators will not investigate in plenary.

Assessment

- **Before Session 1:** Pre-assessment (Kirkpatrick level 2 learning; performance scenarios plus short confidence items)
- **After Session 3:** Post-assessment (different examples, same skills)
- **After each session:** Optional session evaluation (Kirkpatrick level 1 reaction)
- **About 30 days after the series:** Optional transfer follow-up (Kirkpatrick level 3 behaviour, self-reported)
- **During sessions:** Worksheets scored with a four-point rubric
- Results are reported in aggregate. Small groups (15 to 40) cannot support reliable subgroup analysis. Level 4 (organizational results) is outside this kit's scope.

Materials you will receive

- Session worksheets and case text (HTML and PDF)
- Data-responsibility checklist
- Transparency card template
- Skills rubric (for transparency)
- Links to references

After the series

- Try one screening or verification step on an approved, low-risk task at work
- Bring de-identified questions to the clinic
- If your organization adapts this kit, affected-community representatives should be involved in that adaptation process (see AAP design note)

Accessibility

- Primary format: accessible HTML on the kit website
- PDFs are tagged and passed automated PDF/UA-1 checks. Ask for HTML if a PDF is harder for you.
- Describe visuals: diagrams include text equivalents in the guide pages
- Contact [host accommodation contact] for captioning, interpretation, or schedule adjustments
